Academic Details

- **Bachelor of Technology (B.Tech.) Computer Science Engineering**
GTB4CEC, RAJOURI GARDEN;
CGPA: 8.18 (Current)
(Will be Passing in-2026)

Soft Skills

Analytical | Collaborator | Leader | Adaptable

Technical Skills

- **Programming Languages:**
JavaScript, Python, Go, Java, C++
- **AI/ML Tools & Frameworks:** TensorFlow, PyTorch, Scikit-learn
- **Data Science Tools:** Pandas, NumPy, Matplotlib, Jupyter
- **AI Concepts:** Machine Learning, Deep Learning, NLP, Computer Vision
- **Frameworks:**
React, Express, Node.JS, Tailwind

Core Competencies

Agile Methodologies

Restful API

Debugging

Microservice Design

Performance Optimization

System Scalability

Personal Details

Date of Birth: 26th October 2003

Languages Known: English and Hindi

Address: Rohini, Delhi

Profile Summary

- A highly motivated software engineer with over two years of experience developing scalable, AI-powered solutions. Proficient in Python, Java, and C++ with expertise in machine learning, natural language processing, and deep learning frameworks such as **TensorFlow** and **PyTorch**. Skilled in designing cloud-based AI systems and optimizing performance for real-time AI applications.
- **Achieved a reduction in system downtime** by enhancing edge server monitoring efficiency, showcasing a strong commitment to improving system performance and uptime metrics.
- An experienced person who has an excellent proficiency in **Cyber-Security and Ethical Hacking**.
- Identified the bottlenecks in the existing DNS and implemented scalability to **reduce DNS resolution latency from 28ms to 7ms**.
- Possesses **in-depth knowledge of multiple technology stacks** which in turn contributes to an efficient development stage of products.

Training Experience

- Completed Microsoft Aure AI fundamentals : Generative AI.
- Undertook DSA in Java by Coding blocks.
- Completing WebDev Training by Coding Blocks.
- Completed Ethical Hacking and Cybersecurity By University Of Delhi.

Achievements:

- Led my team in developing a distributed AI based recommendation system in Code Cubicle 3.0.
- Led my team in developing a solution in Hack24 By IIITD.
- Streamlined edge server monitoring processes, resulting in an improvement in system uptime and performance.

Academic Projects

AI Resume Builder

Tools: Python, TensorFlow, Flask

PROJECT-DESCRIPTION:

Developed an AI-powered resume-building tool using natural language processing to analyze and recommend improvements for resumes. Enhanced scalability to handle simultaneous user inputs efficiently.

AI-Based E-Commerce Recommendation System

Tools: Python, Scikit-learn, Django

PROJECT DESCRIPTION:

Designed a recommendation engine using collaborative filtering to personalize product suggestions. Integrated into a full-stack e-commerce platform, improving user engagement by 20%.

Automated Resume Builder Using MERN

Tools: React, Node, MongoDB, Express.JS, Tailwind.CSS

Roles: Hardware Program, Full-Stack web application, Deployment

PROJECT-DESCRIPTION:

Used my skills to design a fully functional website which can be used to generate a free resume for everyone using Gemini API for an amazing user experience.
